

Swine Earnotching Tutorial

The right ear is used for the litter ID.
The left ear is used for the individual ID.
Right and left are established as the pig's right and left.

Click each screen with your mouse to move to the next screen.

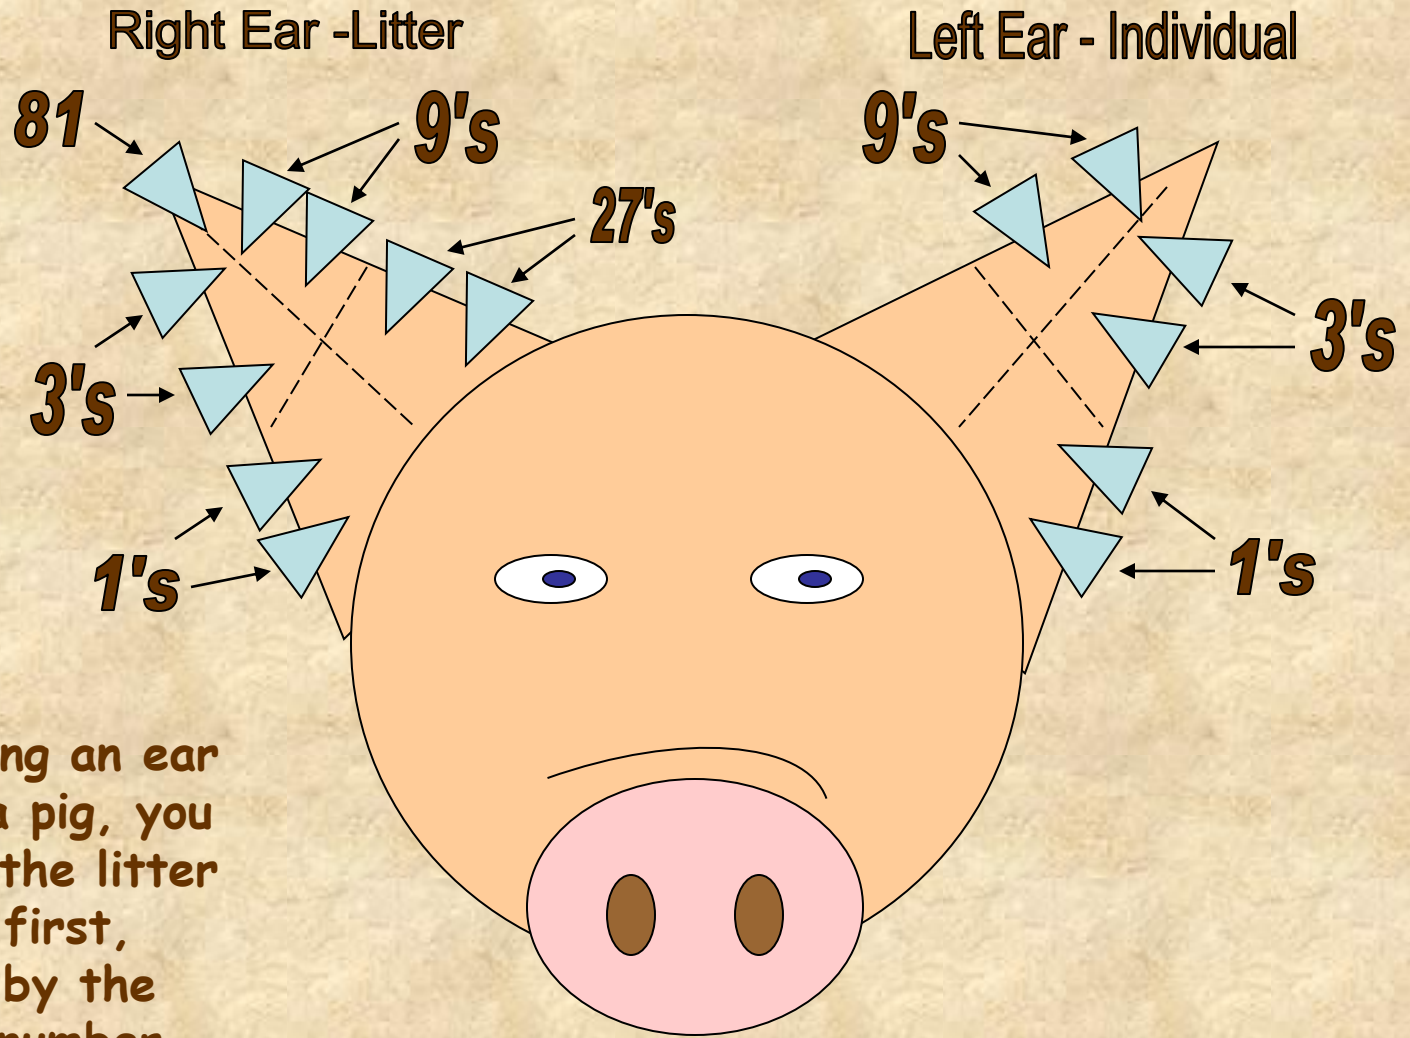

Swine Earnotching Tutorial

Each ear is divided into four quadrants. No more than two notches per quadrant are allowed.

The 81 notch is an exception to the rule, only one 81 notch is allowed in the right ear.

Swine Earningotching Tutorial

When reading an ear
-notch on a pig,
you always say the litter
number first,
followed by the
individual number.

Left Ear - Individual

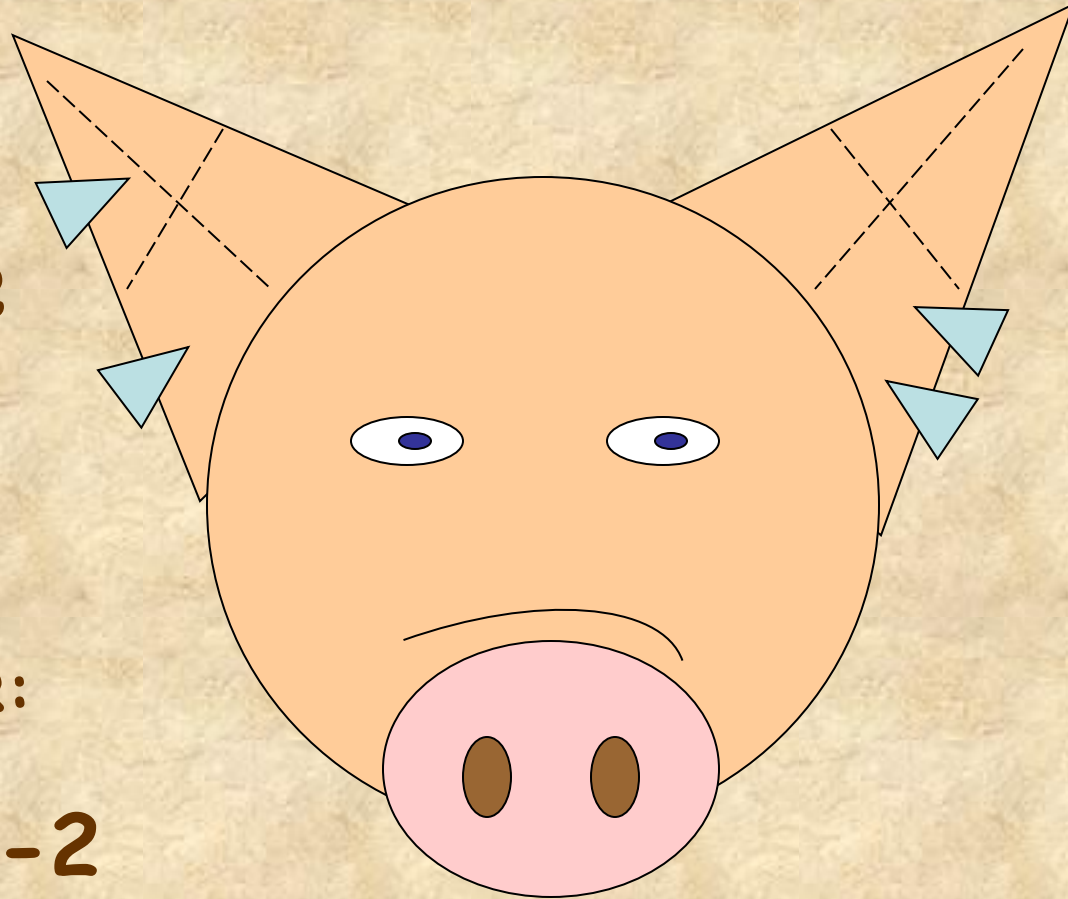

Let's Practice

$$27+9+3+1$$

$$3+3+1+1$$

ANSWER:

$$40-8$$

Swine Earnotching Tutorial

Right Ear - Litter

Left Ear - Individual

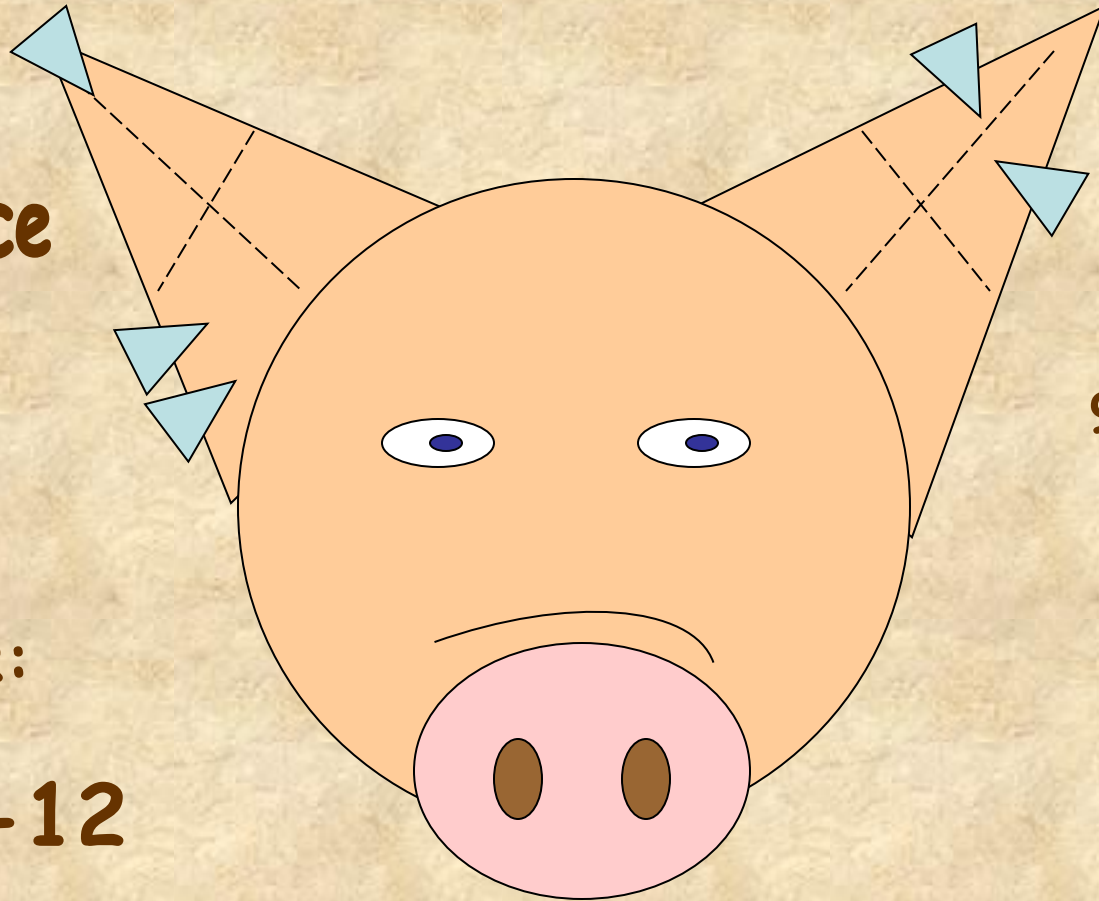

Let's Practice

$$81+1+1$$

$$9+3$$

ANSWER:

$$83-12$$

Swine Earnotching Tutorial

- For advanced earnotching, a 27 notch in the pigs left ear, counts as a 200 notch for the right ear
- An 81 notch in the pigs left ear, counts towards the right ear. for example, a pig with two 81 notches (one in each ear) would count as 162 towards the litter number.

Swine Earnotching Tutorial

Right Ear - Litter

Left Ear - Individual

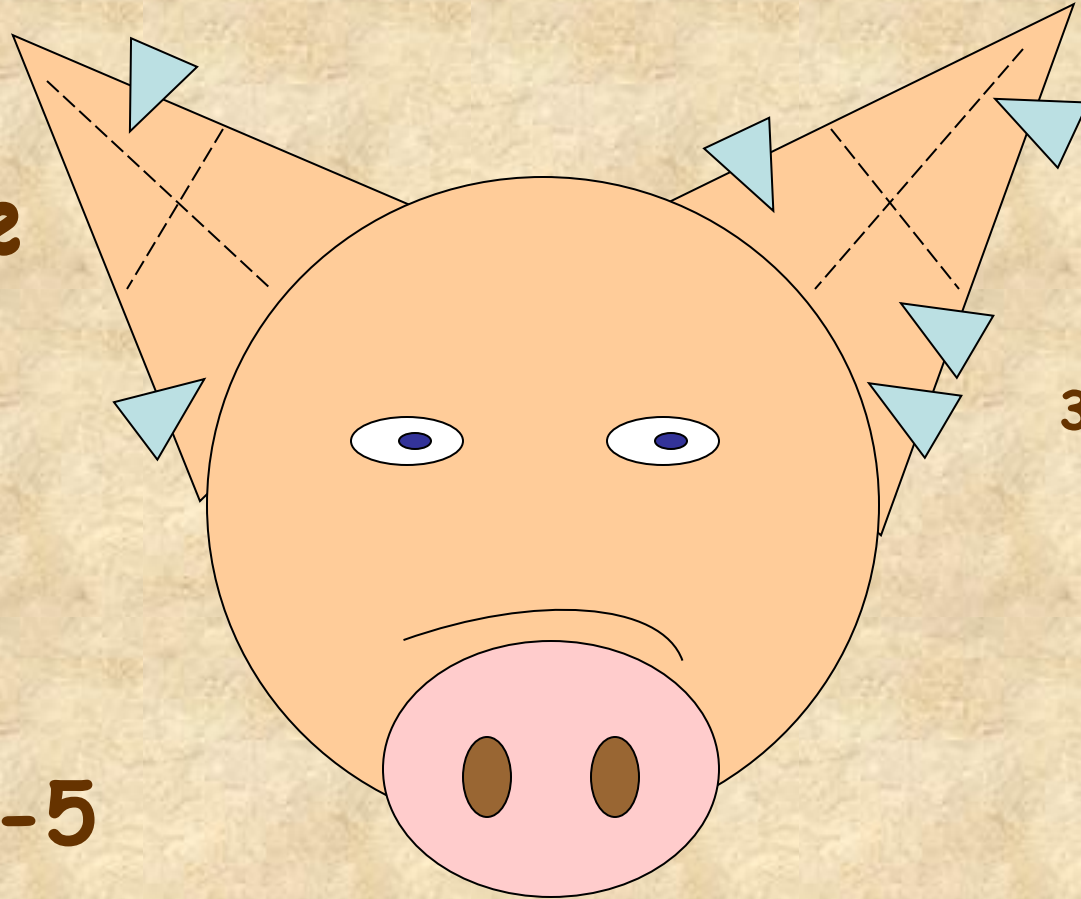

Let's Practice

$$200+9+1$$

$$3+1+1$$

ANSWER:

$$210-5$$

Swine Earnotching Tutorial

Right Ear - Litter

Left Ear - Individual

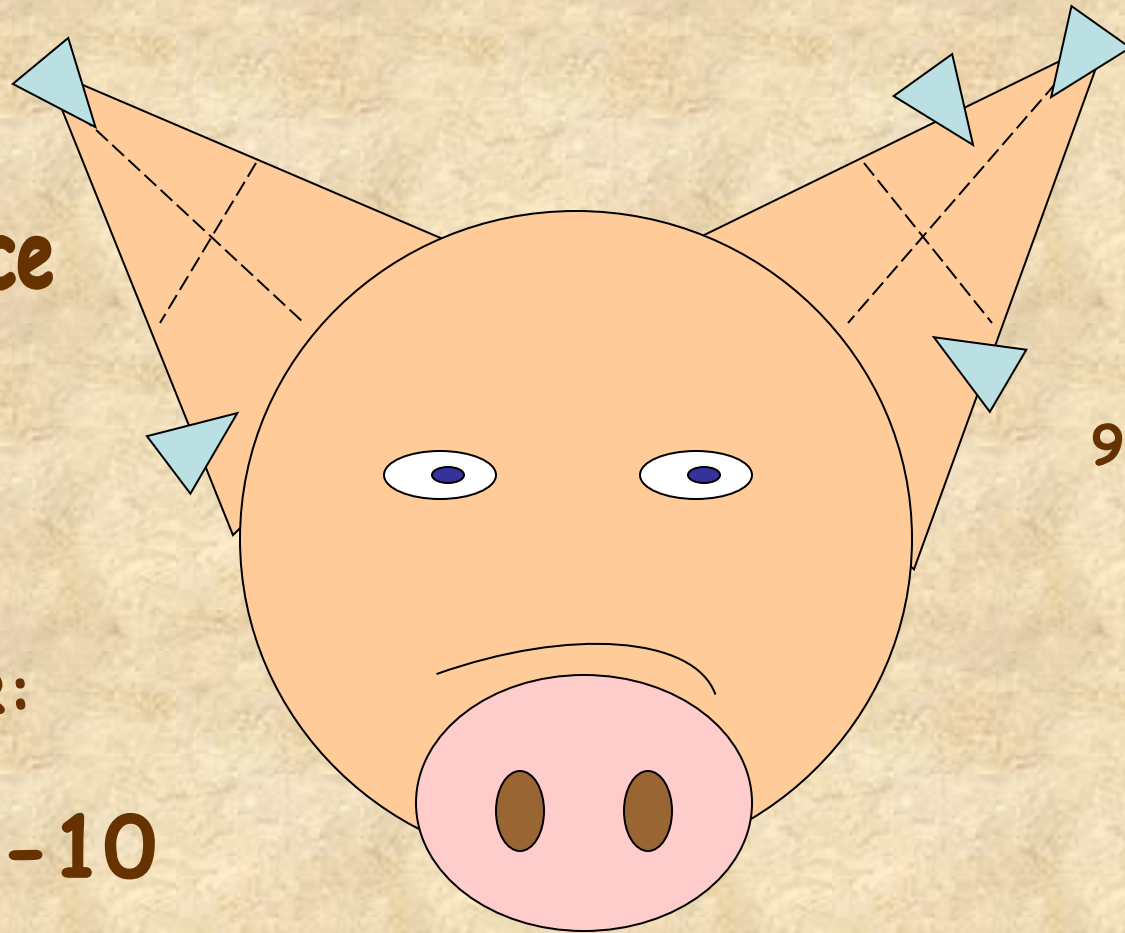

Let's Practice

$81+81+1$

$9+1$

ANSWER:

$163-10$
